Discharge Summary

Patient: PATIENT F AA

Med Rec#: 1234

Birth Date: 09/01/1951

Referring Physician: Gregory Davis, M.D.

Admission Date: 11/9/2007

Discharge Date: 11/11/2007

ADMITTING DIAGNOSIS:

- #1. Left Carotid Stenosis
- #2. Back problems no prior surgery
- #3. Diabetes [250]
- #4. Hypertension [401.9]
- #5. Ulcer in the past.

DISCHARGE DIAGNOSIS:

- #1. Left Carotid Stenosis, s/p Left Carotid Endarterectomy
- #2. Back problems no prior surgery
- #3. Diabetes [250]
- #4. Hypertension [401.9]
- #5. Ulcer in the past.

Admission History: The patient is a 65 year old Caucasian male seen for evaluation of left Carotid bruit and an MRA demonstrating left carotid stenosis at 85%. The right side is at 40%. He is asymptomatic, denies visual changes, amaurosis fugax, denies weakness, numbness or speech problems. He is a former smoker, but stopped in 2001. He has hypertension and Diabetes controlled with oral agents. He has been on ASA 81 mg 1 PO qd. Has not taken Plavix.

Hospital Course: The patient was admitted and underwent a left carotid endarterectomy under local regional anesthesia. He tolerated the procedure well and was transferred to the intensive care unit for observation and blood pressure monitoring. He remained stable overnight, blood pressure was stable, he was neurologically intact and was transferred to the surgical unit on telemetry.

On the surgical unit, he continued to improve. He is taking oral intake well. He is neurologically intact and the wound is healing well. He is judged ready for discharge.

Discharge Medications: Tylenol 650 mg by mouth q 4-6h as needed for pain. He will resume all home medications including ASA.

Discharge Instructions: He was advised no straining or lifting greater than 10 lbs. for 2 weeks, no driving for 1 week. He will return to the office for follow up in 1 week. Diet is as tolerated.
